Re: Stone Resources LLC and release of reclamation bond Burgundy quarry, North Canyon.

Mr. Mansfield:

I am writing to seek an early resolution of the requirements, if any, to complete reclamation at the Burgundy quarry and the release of the reclamation bond. The Burgundy quarry was cleaned and all high walls reduced as part of the completion of reclamation for the other quarries. I understand you desire some seeding and burning of the access road. My dilemma is the outstanding order from the State Office provides that no mechanized equipment is permitted in the quarry. Without your on-site supervision of any reclamation operation I would be reticent to proceed for fear of being found in violation of the State Order. I am requesting a resolution to this problem. The State Order provided 48 hours notice for supervision by a BLM employee?

I completed all of the prior reclamation work you required at the other North Canyon quarries with the exception of pulling down and contouring the berm at the west end of the parking lot area (as you described it) at the buckskin quarry. Because of inclement winter weather the berm was not contoured. I have left a front end loader on site for this purpose. I also wanted to further discuss this with you as I think the berm may protect the adjacent area to the west from 4 wheeler encroachment and you may want to reconsider. In any event I am ready to complete this item on your confirmation.

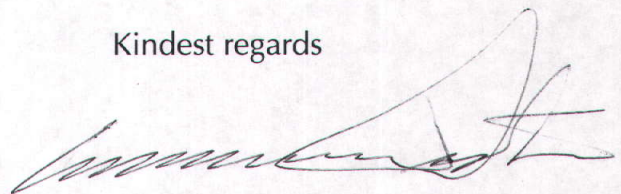

What I would like to suggest that you set a time when I can meet with you at the Burgundy quarry with my machine operator to complete any reclamation work you deem necessary. I do not believe this will take more than one day. Once any machine work is completed I would proceed to seed any areas your think require seeding.

I would further request that you allow DOGM to release \$5,000 of the current \$16,000 bond - all of which amount will be reserved and expended toward completion of the required work in reclamation. Unfortunately, I had some vandals enter my property and destroy my Kenworth T-2000 tractor - which has cost me \$6,000 in repairs. I require this highway tractor to ship product from the Black Rock quarry to customers of Allroc Fine Aggregates which should start in the next 14 days depending on spring weather. The release of \$5,000 of the existing bond to pay for any reclamation would assist my cash flow in this interim period.

Would you give me a call to discuss timing etc. - 801-706-3462. I would appreciate the BLM expediting a resolution of the issue of Burgundy reclamation and bond release. I have been in discussions with DOGM over this matter for several weeks and it does not appear to be moving very fast.

Thank you again for your attention to this matter.

Kindest regards
